

## *A Soup*

### *A soup*

*In here is maybe more important than a new pair of state boots  
See it's viewed as being more than just a meal  
Because a certain amount of them could seal or break a deal  
Their legal tender and a tangible currency  
Far more than sustenance for when one is hungry  
They control how the population reacts  
Right next to nutty bars, honey buns, and cookie racks  
But yet and still Rhaman remains at the top  
No doubt that without which all the movement would stop  
Everyday with the passing of every hour  
Something as simple as some noodles gains so much power  
And everybody seem to have their favorite seasoning pack  
That will either land you on your back or get your blood pressure out of whack  
So as long as you know me remember that if you owe me  
Find you some so you can "Pay me my monies"!  
Because if you don't I just my find a foul mood  
Then don't worry about the starch and just eat you like some food  
And if your more than a mouth full I'll call out the troops.....  
That's right partner all that over "a soup"*

*The Wordist — WAM*
